REPRINT

A CASH REGISTER EXPANSION FOR THE TRS-80

THE CR-180™ CREATES ANOTHER MARKET FOR THE TRS-80™

The CR-180™ is the first complete cash register system available on the market nationally which interfaces directly with the Radio Shack TRS-80™. This unique system offers you the standard functions of a cash register: *cash drawer receipt center* combined with a *comprehensive inventory control and information processing system*. The CR-180™ is easy to use and ready to run ... it plugs directly into the TRS-80™ without any modifications, simply load the point of sale software package and you're ready to begin.

General Description

The CR-180™ is a new dimension in the cash register system. It is a cash register system built for the future as well as today. The CR-180™ combined with the TRS-80™ provides exceptional versatility for today's needs, is easily adaptable for future requirements and it does not prevent the use of the TRS-80 for any other program applications.

The basic CR-180™ package includes an electronic cash drawer, interfacing software and receipt printer (ALL OF WHICH ARE AVAILABLE SEPARATELY). Each component plugs directly into the TRS-80™ allowing instant installation.

Features of the CR-180™ Point of Sale Package Sales Transaction

As a cash register the CR-180™ will accurately record and print out facility name, date, item,

CR-180™ attached to a Model III TRS-80.

quantity, price, and a special greeting (i.e.; thank you, happy holidays - just think, your receipt could be used as a ticket stub for a special promotion or contest or it could be used to introduce new products). The receipt printer which comes with the standard system, prints a full 40 print spaces. Radio shack and other model printers will also work with the CR-180™ programs.

Inventory Control

The CR-180™ functions as a tool for inventory management and control, recording the stock number and keeping track of stock used and received. It will provide instant verification of the stock number and items as sold.

Display Screen and Keyboard Enhancements

The system uses the TRS-80™ display screen and provides the operator with an instant display of the information entered into the cash register. Through the use of the display screen the user is provided with operating instructions and lead through dialog on every transaction eliminating errors and reducing employee training. The cash register operator can at any given time review the information entered into the system by use of the display screen before printing out a final receipt.

The display screen may also be used as an excellent add on selling tool by asking questions in the lead through that remind the operator to recommend or add on additional purchases.

The TRS-80™ keyboard has been enhanced to provide audio recognition whenever any key is depressed.

The CR-180 Point of Sale Package is shown here in a Best Western Motel.

Security

The system assures the accuracy of proper handling of cash by employees by computing correct change. In addition each employee is given a security code that must be entered into the cash register before it will function. It will also keep track of transactions by each employee utilizing the system, on a daily, weekly, monthly or yearly basis.

The system includes an electronic cash drawer with a dual key lock release allowing manual access by management or authorized personnel. In addition two types of cash drawers are available for register or under counter mounting.

Employee Sales Data

The CR-180 will automatically keep track of sales by employee, and accurately record sales trends (such as time, date and month of purchase).

Accounting

The system keeps a running total of sales at all times. Periodic sales and gross profit reporting is available to management. In addition, it will total sales by type — VISA, MasterCharge, American Express, check, cash, or other types. The system also features:

- Rapid Adjustment of Pricing for Sales Promotions
- Printing Price Labels for Products listing the Stock Number, Item Number and Price

The CR-180 will also compute accurate sales tax.

Cash register expansion systems are also being announced for the Xerox 820 microcomputers.

Options

- Restaurant Pre-Check, Food Costing and Inventory Control
- Payroll Computation
- Automatic Pricing
- Foreign Language Models (Spanish, German and French)
- Polling Software (to be released)

The CR-180 interfaced with the TRS-80 does it all. For more information contact your local dealer.*
